

AYUSH JHA

Cybersecurity Leader | Vulnerability Management | Security Risk Governance | Exposure Management | Threat Intelligence | Security Operations

Austin, Texas | (636) 497-2300 | ajha985@gmail.com | linkedin.com/in/ayush-jha009 | L-2 Visa — Authorized to work for US employers

PROFESSIONAL SUMMARY

7+ years leading enterprise Vulnerability Management and GRC programs across hybrid cloud and on-premises environments, managing teams of 8–9 analysts and delivering 25–35% measurable risk reduction for global organizations. Proven track record translating technical vulnerabilities into business risk insights and partnering with engineering and leadership teams to strengthen enterprise cyber resilience. Hands-on with Tenable, Qualys, Splunk, and ServiceNow GRC; frameworks include NIST CSF, NIST 800-53, ISO 27001, CIS, and PCI-DSS. AWS SAA and CEH certified; CISSP in progress (Expected Nov 2026).

PROFESSIONAL EXPERIENCE

Cybersecurity Consultant | Coforge | London, United Kingdom

Dec 2021 – Oct 2025

Deployed to International Airlines Group (IAG — British Airways, Iberia, Aer Lingus) leading enterprise vulnerability management and security risk governance across a 160-country hybrid cloud and on-premises environment.

- Led the enterprise Vulnerability Management program across hybrid cloud and on-prem environments, managing a team of 8–9 security analysts and consultants responsible for vulnerability discovery, triage, and remediation coordination.
- Implemented risk-based vulnerability prioritization using CVSS, EPSS, exploitability intelligence, asset criticality, and business impact — improving remediation efficiency and increasing closure rates by 35%.
- Partnered with engineering, DevOps, and infrastructure teams to govern remediation SLAs and reduce enterprise security exposure by 25%.
- Delivered executive-level risk dashboards and vulnerability posture reporting, enabling leadership visibility into remediation trends, exposure concentration, and risk reduction progress.
- Established governance aligned with NIST CSF, NIST 800-53, ISO 27001, CIS benchmarks, and PCI-DSS, reducing compliance gaps by 20% and improving audit readiness.
- Directed third-party security assessments and CSPM reviews, strengthening supply-chain risk management and cloud security posture across AWS and Azure environments.
- Integrated DLP controls into cloud-native workflows, reducing PII and transaction data leakage risk by 30%.
- Mentored junior analysts on vulnerability triage methodology, risk prioritization, and remediation validation — improving analytical consistency and accelerating onboarding for new team members.

Senior Associate — Security | Provana | Noida, India

Oct 2020 – Oct 2021

- Supported enterprise security governance and compliance initiatives aligned with NIST CSF and CIS frameworks, contributing to a 20% reduction in audit findings.
- Coordinated vulnerability remediation across infrastructure and application teams, tracking 500+ vulnerabilities through to closure within defined SLAs.
- Managed security risk registers and remediation tracking, improving visibility into open risk items and mitigation progress for management reporting.
- Developed and validated incident response procedures and escalation workflows, improving coordination between SOC, infrastructure, and security teams.
- Optimized SOC alert triage workflows and automated security monitoring processes, improving operational efficiency and analyst response consistency.
- Contributed to security control validation and audit readiness activities, supporting internal and external compliance assessments.

Network Administrator | UrbanEscent | Gurgaon, India

Oct 2019 – Oct 2020

- Strengthened enterprise network security through segmentation, firewall governance, and Zero Trust principles, improving system integrity by 30%.
- Managed enterprise network infrastructure including firewall governance, network segmentation, and secure access policies, reducing lateral movement risk.
- Supported centralized logging, threat monitoring, and forensic analysis, assisting in detection, containment, and remediation of security incidents.
- Administered endpoint security and antivirus controls, reducing exposure to malware and unauthorized system access.

Associate — IT Infrastructure | Provana | Noida, India**Jul 2018 – Oct 2019**

- Managed patch management and system hardening across Windows and Linux servers for 150+ systems, achieving 100% compliance with critical security updates.
- Administered identity and access management controls, enforcing least-privilege access and reducing privilege-related exposure by 40%.
- Supported endpoint security deployment and maintenance, ensuring enterprise systems adhered to baseline security standards.
- Assisted with security monitoring, patch validation, and vulnerability remediation across mixed Windows/Linux server environments.

EDUCATION**Bachelor of Computer Applications (BCA) | IEC University, Solan, India****2015 – 2018****CERTIFICATIONS**

- AWS Certified Solutions Architect — Associate
- Certified Ethical Hacker (CEH) — EC-Council
- CISSP — In Progress | Focus: Security Governance, Risk Management, Enterprise Security | Expected Nov 2026 | (ISC)²

TECHNICAL SKILLS

Vulnerability & Risk Management: Vulnerability Management Program Leadership, Risk-Based Prioritization (CVSS, EPSS), Remediation SLA Governance, Enterprise Risk Reduction, MTTR, Exposure Management

Security Frameworks: NIST CSF, NIST 800-53, ISO 27001, CIS Controls, PCI-DSS, MITRE ATT&CK, Compliance Audit Readiness

VM & Security Tools: Qualys, Nessus, Tenable

Cloud & CSPM: AWS (Security Hub, Inspector, GuardDuty), Azure Defender, Cloud Security Posture Management (CSPM), Microsoft O365 Security

Technical Security: Network Segmentation, Zero Trust Architecture, Endpoint Security, Patch Management

Soft Skills: Stakeholder & Executive Communication, Cross-Functional Leadership, Program Management, Metrics-Driven Execution, Team Mentoring
